

The Sick Man

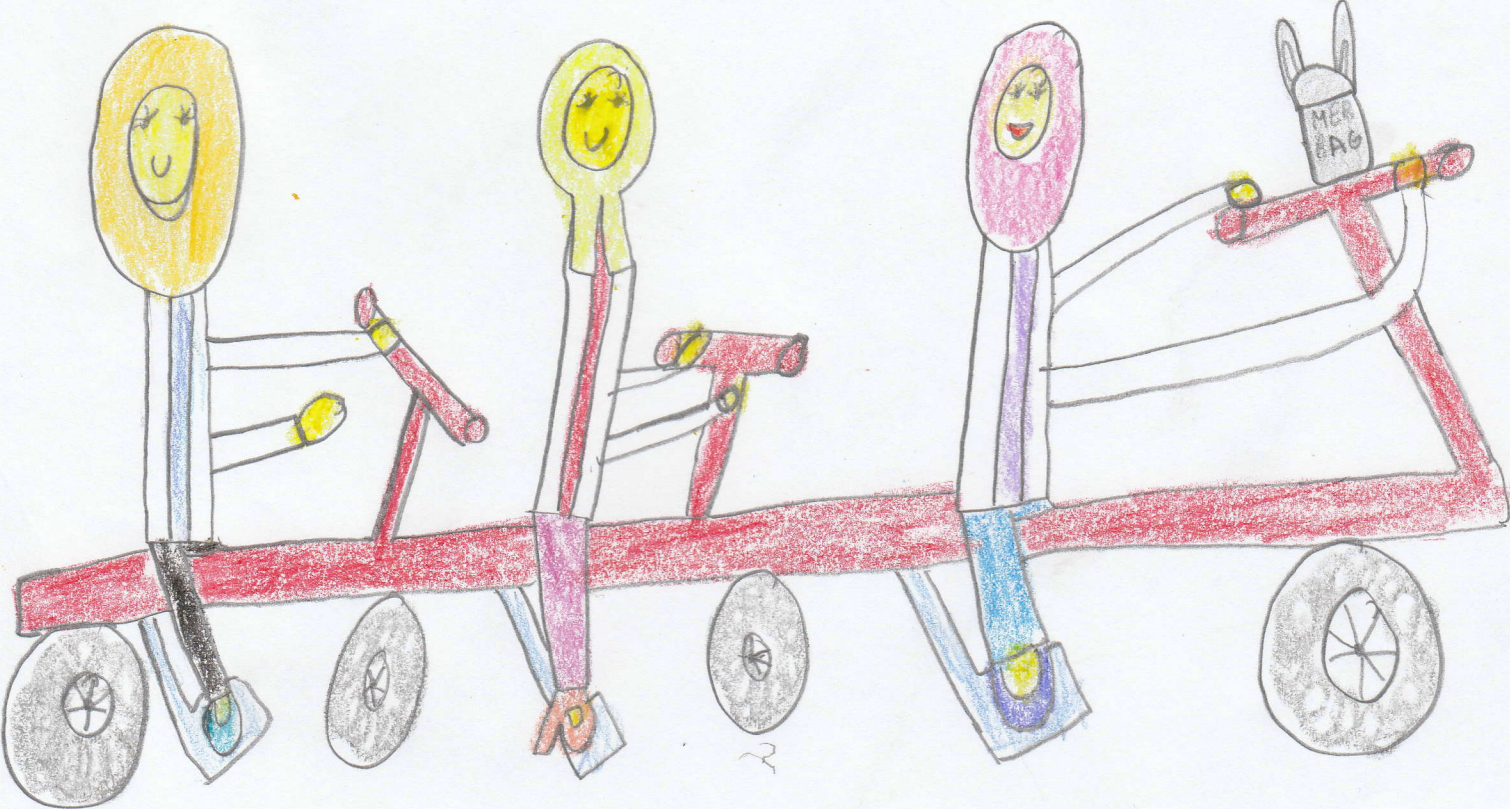

by Aaidah Jallu

I ran down the stairs, ate breakfast, and hopped on my Multiple Bike, along with my medical bag.

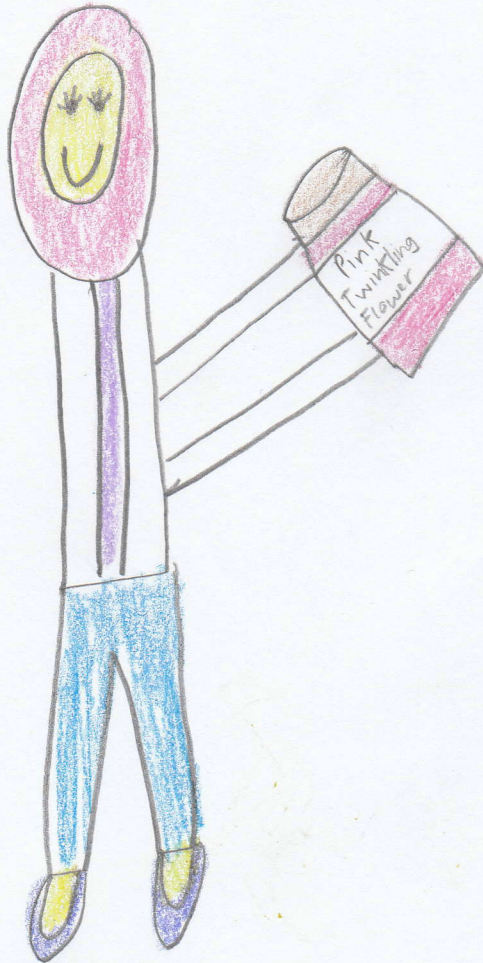

I was going to pick my friends, Sara and Fatiemah, and ride to St. Plane, the hospital where we work. We are doctors.

In the hospital, we met a sick man who had serious situations.
After testing, we found out that this man had Influndra!

Dr. Fatiemah, Dr. Sara, and I tried all type of medicines like Cracks, Green Floride, and much more. We even tried giving special ingrediants like Golden Shine, Clever Sunflower, and much more. But nothing worked. “What are we going to do Dr. Khadijah?” Dr. Sara asked. “I have an idea! Lets see if there is a special secret ingredient which has never been used before and can cure this man!” I said. “Great idea!” Dr. Fatiemah exclaimed. So we searched for that special secret ingredient. And we found it! The secret, special ingredient. The Pink Twinkling Flower. We got a bottle and gave it to the sick man and told him to take 1 full spoon per day.

In 3 days, the man was back to good health! We laughed in relief and went home.
